To Massachusetts Health Centers:

Below outlines the UDS reporting instructions for the above categories:

**Dental Only Patients**
For individuals who do not utilize medical services at your health center (e.g., dental-only patients or behavioral health patients), your health center is expected to track and report their MEDICAL insurance on Table 4 lines 7-11 and on the Zip Code Table. These individuals may not have insurance for dental services, but they may have insurance for primary care and other medical/behavioral health services. Table 4 lines 7-12 and the Zip Code Table record Principal Third Party Medical Insurance Source. For example, a patient seen for dental services only should be asked about their medical insurance during registration. If that has not occurred and the patient has Medicaid, Private, or Other Public dental insurance, you may be presumed to have the same kind of medical insurance. If a patient does not have dental insurance, you may not assume that they are uninsured for medical care, and the health center must obtain this information from the patient.

**Health Safety Net**
The Health Safety Net is categorized as a state or local safety net program. These are programs which pay for a wide range of clinical services for uninsured patients, generally those under some income limit set by the program. They may pay based on a negotiated fee-for-service, or fee-per-visit. They may also pay “cents on the dollar” based on a cost report, in which case they are generally referred to as an “uncompensated care” program. Most are generally “capped” at a maximum total amount, and payments are often paid in a different fiscal year. The following are how your data should be reported across Tables 4, 9D, and 9E.

<table>
<thead>
<tr>
<th>Tables Affected</th>
<th>Treatment</th>
</tr>
</thead>
</table>
| **Table 4**     | • While patients may need to qualify for eligibility, these programs are not considered to be public insurance.  
• Patients served are to be counted on Line 7 as uninsured. |
| **Table 9D**    | • The health center’s usual charges for each service are to be considered charges directly to the patient (reported on Line 13, Column A).  
• If the patient pays any co-payment, it is reported in Column B.  
• If they are responsible for a co-payment but do not pay it, it remains a receivable until it is collected or is written off as a bad-debt in Column F.  
• All the rest of the charge (or all of the charge if there is no required co-payment) is reported as a sliding discount in Column E. |
| **Table 9E**    | • The total amount received during the calendar year from the State or local indigent care program is reported on Line 6a. |
CHIP
It is currently unrealistic for health centers to differentiate between SCHIP and Medicaid (MassHealth). Thus, all individuals covered by Medicaid and SCHIP should be reported on line 8a of Table 4, lines 13a and 13b column A for capitation and managed care fee for service (FFS), respectively, and lines 1, 2a, 2b on Table 9D. If at some point it differentiating between Medicaid and SCHIP becomes more straightforward, health centers will be expected to report SCHIP on line 8b on Table 4.

MassHealth Limited
Report as uninsured on Table 4 line 7.
If you are able to distinguish these charges and collections from regular Medicaid, report on Table 9D line 7. If you are not able to distinguish, report on line 1 of Table 9D.

CarePlus
Report all CarePlus as Medicaid on line 8a in Table 4 and line 1 in Table 9D.

Qualified Health Plans purchased through the Health Connector (including ConnectorCare)
The UDS does not distinguish between Gold, Silver or Bronze plans. As the manual states, all of these subsidized plans are reported as Private Insurance on Table 4 Line 11. Charges and revenues are reported on Table 9D Line 10 (unless the plan is a managed care plan then it is reported on 11a or 11b for capitated and FFS plans, respectively). It is important that grantees reassign the patient portion of third party charges to self-pay Table 9D Line 13 to reflect co-pays and deductibles.

Children’s Medical Security Plan (CMSP)
CMSP is not considered SCHIP by the Bureau of Primary Health Care as it is funded solely with State dollars and does not receive the federal match. It has limited coverage – outpatient only – and children who require inpatient services are linked into/’covered’ through the Health Safety Net Trust Fund.

CMSP is to be reported on line 10a of Table 4. On Table 9D, you should report the revenue, cash, etc. on lines 7, 8a and 8b (other public).

Medicaid Managed Care, including Accountable Care Organizations
MassHealth introduced Accountable Care Organizations (ACOs) for many of its members in March 2018. The goals of an ACO are to deliver better care to members, improve the population’s health, and control costs through care management and coordination. ACOs combine a shared savings/risk arrangement with quality incentives.

For the fully at-risk, primary care-exclusive Medicaid ACOs, ACO revenue for your assigned patients should be reported as Managed Care Fee-for-Service (as the health centers are still paid on a fee-for-service basis) on Line 2b. Excerpt below:
“Report charges for services provided to patients who are assigned to the health center and must receive their primary care from the health center—hence the managed care inclusion—but for whom no monthly fee is paid.”

MCOs post-ACO implementation:
1. BMC HealthNet Plan – you must track the enrollees by the type of coverage and category
2. Tufts Health Together – you must track the enrollees by the type of coverage and category

For a full list of MassHealth ACOs and MCOs, visit: [https://www.mass.gov/service-details/full-list-of-masshealth-acos-and-mcos](https://www.mass.gov/service-details/full-list-of-masshealth-acos-and-mcos)

See the Table below for details/summary:

**NOTE:** On January 1, 2022, MassHealth implemented a new payment methodology for Federally Qualified Health Centers (FQHCs) that bill as Community Health Centers (CHCs) per 101 CMR 304 and 130 CMR 405. The new methodology includes two distinct rates:
- Prospective Payment System (PPS) rate – an individual rate for each FQHC based on historical costs and trended forward

¹ Primary care case management plans that pay PCPs a small fee to manage patient but all services are otherwise paid as straight Medicaid (line 1) on a FFS basis are not MC patients according to UDS instructions. All charges and payments, including CM fee are on line 1.
• Alternative Payment Methodology (APM) claims-based component – a combined medical and behavioral health class rate for certain services / codes (virtually all medical and behavioral health visits)

Per federal law, if the revenue generated by the APM claims-based component is less than what the FQHC would have received under their individual PPS rate, then the FQHC will receive a “wrap” payment to make up the difference (paid on a quarterly basis by MassHealth). For more information, click here: https://www.mass.gov/doc/101-cmr-304-rates-for-community-health-centers/download

Services eligible for the MassHealth PPS wrap payments are reported on the UDS just like any other services covered by Medicaid. Eligible charges (individual health center PPS rate) would be included in Column A of Table 9d, initial payments (from the APM claims-based component) related to these charges would be reported in Column B of Table 9d on a cash basis (in the year that the payments were received), the PPS wrap payments would also be reported on a cash basis (in the year that they were received) in Columns C1 or C2, depending on if they relate to current year charges or prior year charges. The contractual allowance (health center charge amount) related to these services would be reported as any other service, based on the health center’s explanation of benefit.

**DSRIP**

DSRIP funding to pay for technical assistance and other Medicaid transformation activities that are not tied directly to patient services should be counted on Table 9E, line 8: Foundation/Private Grants and Contracts.

**Senior Care Options (SCOs)**

On Table 4, generally the patient would be reported as a Medicare patient (line 9). However, some patients may be considered dual-eligibles, and therefore should be reported on Line 9a. Note that some may be 65+ and only qualify for MassHealth/Medicaid; it is not a requirement to have Medicare to enroll in a SCO. SCOs are distinct from One Care Plans, which do require someone to have Medicaid and Medicare. SCO FAQ here: https://www.mass.gov/service-details/senior-care-options-sco-provider-billing-frequently-asked-questions-faqs.

On Table 9D the collection would be from both Medicare and Medicaid. There should be some rational division of the charges which should be Medicare up to the amount that Medicare pays and then all the rest would go up to Medicaid. This would apply for straight fee-for-service (line 4 and lines 1 for Medicare and Medicaid, respectively), managed care capitation (lines 5a and 2a for Medicare and Medicaid, respectively) and managed care fee-for-service (lines 5b and 2b for Medicare and Medicaid, respectively).

Please get in touch with the SCOs with which you have a contract and determine the gross ratio of Medicaid and Medicare – a gross ratio Medicare to Medicaid is acceptable, or outpatient allocation of Medicare to Medicaid would work as well. Use this on Table 9D and allocate between Medicare and Medicaid proportionally. The six SCO plans are listed here:

NOTE: As a reminder, One Care is for adults 21-64 with disabilities who are dually eligible for both MassHealth and Medicare due to their disability status. List of One Care Plans here: https://www.mass.gov/service-details/one-care-plans

Program of All-inclusive Care for the Elderly (PACE)
Report all clinicians associated with the PACE program on lines 1-11 of Table 5 and line 1 of Table 8A. Count medical visits provided by these clinicians if they meet the UDS criteria (i.e., face to face, documented in the patient’s chart, independent clinical judgment is rendered, provided by a licensed clinician). You may include nursing FTEs on line 11 along with their visits as long as they meet UDS criteria but do not include nursing visits on line 11 that are for custodial services. Report charges for these visits and collections (take some reasonable portion of PMPM) on Table 9D – you will need to determine the split between Medicare and Medicaid.

NOTE: What we are trying to determine is the reasonable part of your PACE reimbursement that is due to outpatient care. It is acceptable for you to work ‘backwards’ by determining the medical costs and using this amount as the payments on Table 9D column B (with corresponding gross charges in column A).

For ancillary and wrap services, including the personnel providing these services, report them on line 29a of Table 5, the costs for them on line 12 of Table 8A, and the income received for the portion of the non-clinician-provided services goes on line 10 of Table 9E.

For the ancillary and wrap services, PACE programs are shown as an expense on line 12 Table 8a. You do not include any visits from the PACE program on Table 5. Staff for the PACE program should be counted on line 29a of Table 5. The income is shown on Table 9E line 10.
If patients enrolled in PACE come into the health center and see a physician who is part of your 330 staff with legitimate medical visits (face to face, documented in the patient’s chart at the health center, independent clinical judgment, etc.), then the physicians and mid-levels providing this care at the health center would be counted on lines 1-11 of Table 5 along with the medical visits in column b and the patient on line 15 column c. Do not include nursing visits that are for custodial care (so, do not include these visits on line 11 of Table 5, but include the FTEs).

NOTE:
- Count all the medical visits
- Count all FTEs

If Medicare pays you for the visits (in which the PACE enrollee saw a 330 clinician) above the PACE PMPM, then you would show the charges and collections for that visit on Table 9D. If Medicare does not reimburse you for this 330 visit, then you would show a reasonable medical PMPM on Table 9D line 4a and reduce the amount on Table 8a.

Self-pay Sliding Discounts
On Table 9D, line 13, column e, report only slides for individuals who are low income (200% FPL).

a. Report gross charges for all individuals on line 13 column A
b. Report cash received for patients on line 13 column B

c. Report cash from HSN on Table 9E line 6a

The ‘extra slides’ (i.e., slides for individuals greater than 200% FPL) are not reported anywhere on the UDS.

Patient Centered Medical Home - A number of health plans in Massachusetts are providing PMPM dollars for the health centers to pilot PCMH.

d. Should these be counted as MM on Table 4? No

e. The income from this PMPM should be by payor on T9D column B. The payment should be listed in column C3.

Boston Public Health Commission
There has been some inconsistency regarding the categorization of the funds received from the Boston Public Health Commission. The funds are public. Therefore, funds received from the Boston Public Health Commission should be reported on Table 9E line 7 (local government).

Community Health Workers
Community Health Workers can perform many functions at a health center and thus can be classified across many lines on Table 5 in the Enabling Services section. Per the instructions, care should be taken to distribute an individual staff members time across 1 or more columns reflecting what functions they provide at the health center. The manual specifically states that:

Community Health Workers (Line 27c) are lay members of communities who work in association with the local health care system in both urban and rural environments and usually share ethnicity, language, socioeconomic status, and life experiences with the community members they serve. Staff may be called community health workers, community health advisors, lay health advocates, promotoras, community health representatives, peer health promoters, or peer health educators.

Specific consideration should be made to ensure that CHWs who provide Case Management or Patient/Community Health Education services are categorized on these lines so that their visits can be appropriately reported. Also note that CHWs cannot generate countable UDS visits. If a CHW is categorized 100% FTE on line 27c, visits should not be reported as case management without a corresponding FTE.

Counting Nurse Triage Visits
Triage visits are one of the most common type of nurse visits reported on the UDS on Table 5, Line 11. To be a countable nursing visit, the encounter must meet all visit criteria and the patient is not seen by another provider at the same service delivery site on the same date of service.
It is recommended that the health center track the countable, reportable visits using this code with either a zero charge or a fixed fee schedule charge with a corresponding sliding fee discount, if applicable, and/or bad debt write-off, based on the health center’s policies and procedures.

**COVID-19 Funding**
During the COVID-19 public health emergency, health centers may have received targeted funding to prevent, prepare, and respond to coronavirus disease. Below is a list of where these funds should be listed on Tables 8a Financial Costs, 9d Patient-related Revenue, and 9e Other Revenues:

<table>
<thead>
<tr>
<th>COVID Costs and Revenues Sources</th>
<th>Table and Line for Reporting</th>
